Our Device Perspective

Enable information and experiences to span:

The Device Landscape

Fixed function to multi-function devices

Pressure to do more, with less

Shift from proprietary to commercial software

8 and 16-bit to 32+ bit

Microsoft's Mobile And Embedded Strategy

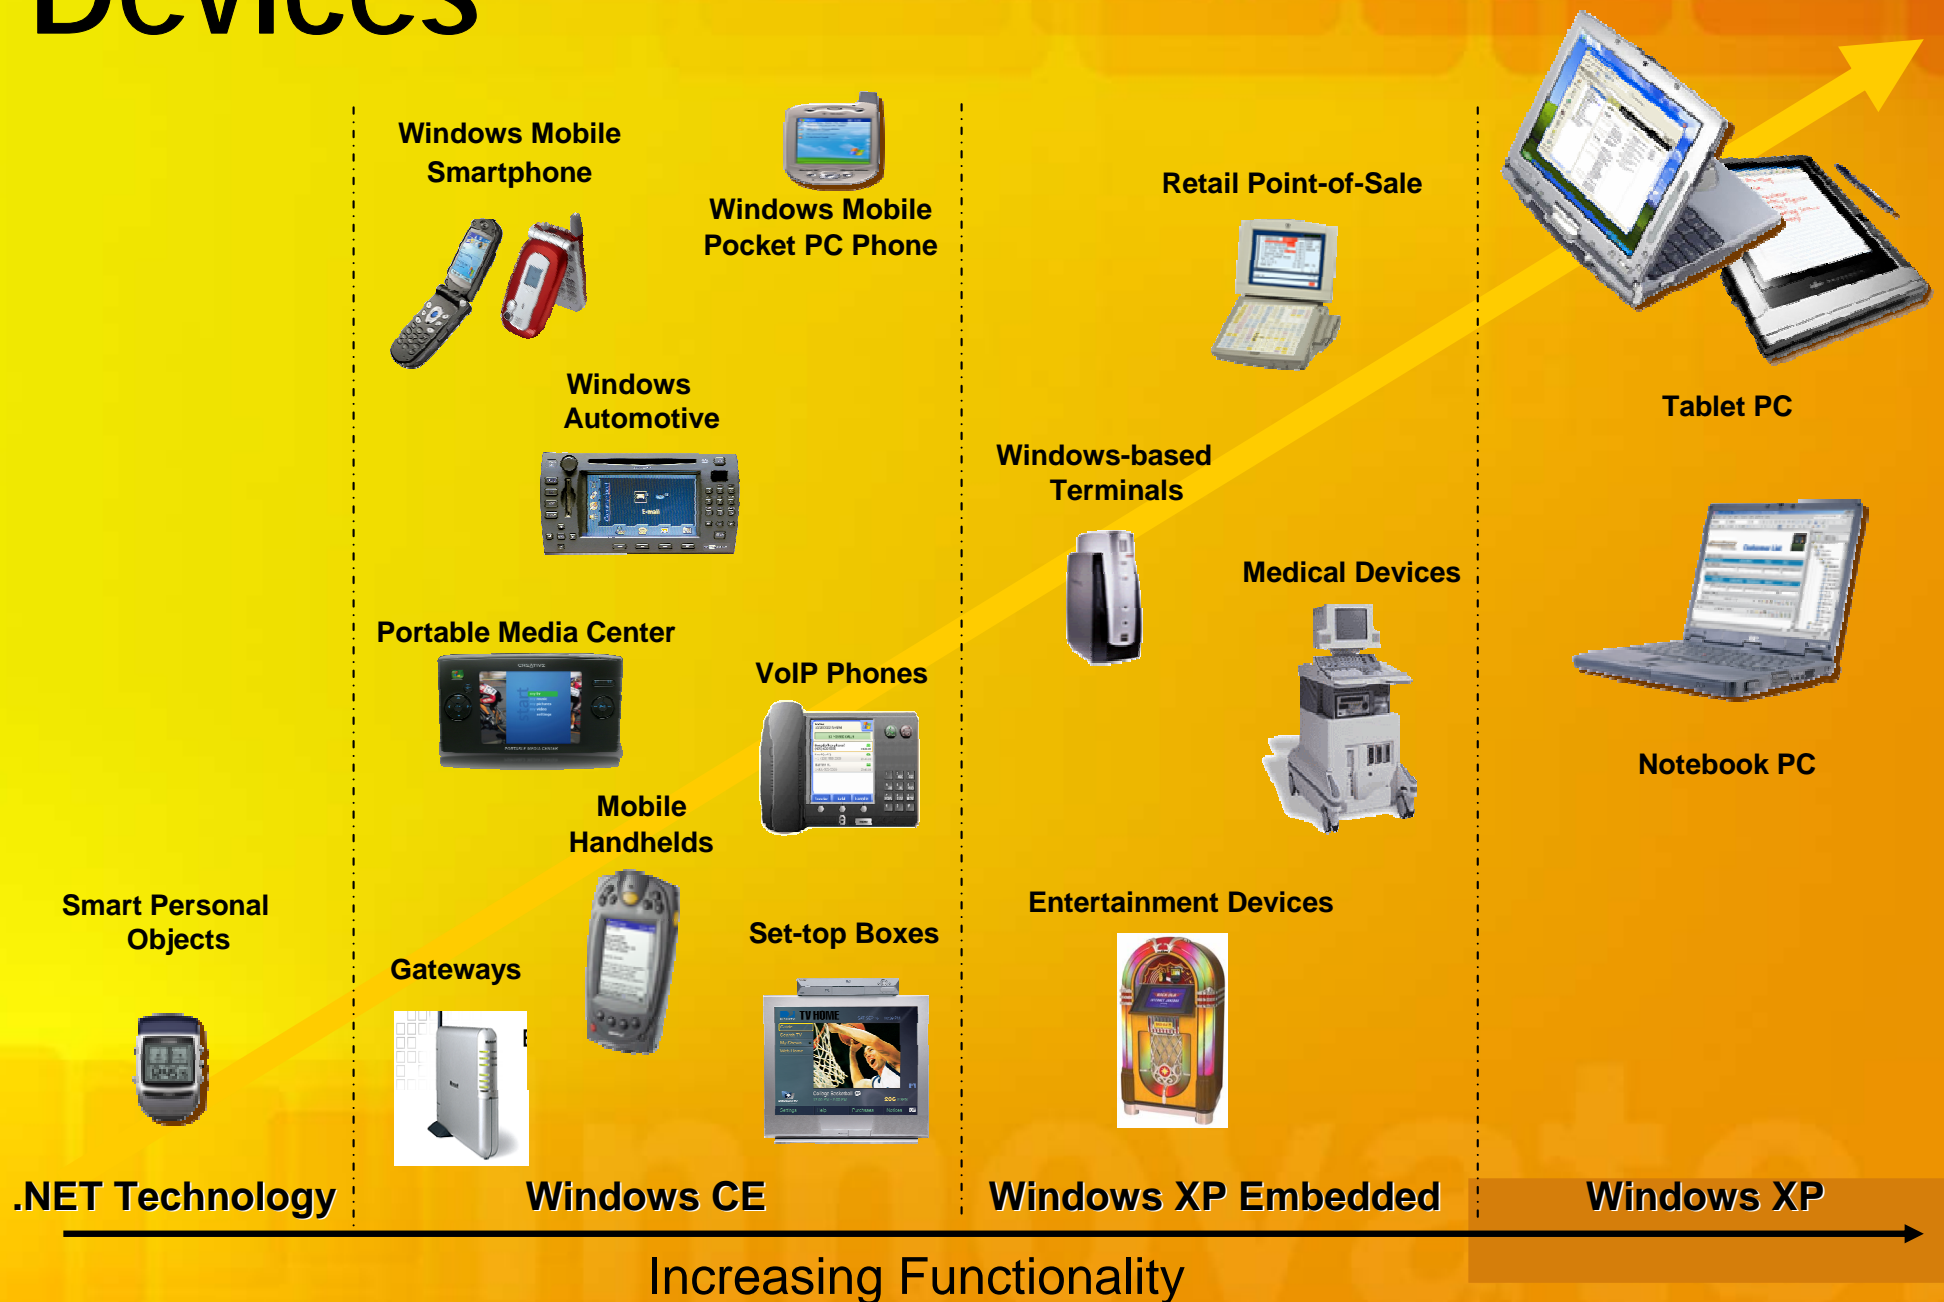

Focus

- Provide 32-bit software building blocks
- Integration between devices, PCs, servers and Web
- Enable rich applications and services

- Low-cost, easy to use software
- Partners for services
- Shared success model

Business Model

Mobile and Embedded Devices

Windows Embedded Platforms

Windows XP Embedded

The most complete embedded platform enabling advanced devices by delivering the power of Windows in componentized form

Windows CE

Windows CE integrates reliable real time capabilities with advanced Windows technologies to rapidly build a wide range of innovative, small-footprint devices

Windows XP Embedded

Quick facts

- Componentized version of XP Professional -- brings the full power of Windows to advanced devices
 - Over 10,000 components to flexibly build a customized device
 - Embedded-specific features enable wide range of boot, storage, deployment, and manageability options
- Rapid development
 - Powerful Tools for building custom devices
 - Extensive support for Win32 and low-cost PC hardware
- Reliable
 - Built on the robust Windows XP Kernel
 - Embedded specific capabilities to increase reliability in devices

Windows XP Embedded With SP2

Quick facts

- Enhanced security
 - Windows Firewall component
 - Configurable in Target Designer
 - Hardened Internet Explorer
- New platform technologies supported
 - Bluetooth stack and profile
 - Software Update Service (SUS)
- Other features coming in SP2
 - DirectX9 subsystem APIs
 - .NET Framework 1.1
 - Enhanced Write Filter (EWF) improvements
 - Comprehensive documentation update

Windows CE

Quick facts

- Integrated reliability
 - Componentized, hard real-time operating system
 - System wide reliability and manageability
 - Extensive wireless support for secure connectivity
- Greater productivity
 - Native Windows integration
 - Powerful development and emulation environments
 - Broad driver and CPU support - x86, MIPS, SH 3/4, ARM
- Shared success
 - Low upfront investments
 - Broad source access and design flexibility
 - Knowledgeable worldwide partner base

Windows CE 5.0

Quick facts

- Tools Updates
 - Combined IDE and command line build tools
 - Rapid O/S development for novice and power users
- Operating System Updates
 - Over 300 operating system updates over version 4.2
 - Includes
 - Kernel (64 Interrupts, watch dog timer, EDB, others)
 - Multimedia (DirectX Mobile, DRM, Image Library, drivers, WM Codecs)
 - Drivers (PQD Drivers and BSP, USB 2.0, SDIO)
 - Internationalization (MUI updates for Asian Language)
 - Browser (Popup Window Blocker, RPC, Theming, TV Lens)
 - Networking (Native 802.11, Bluetooth PAN, HID, Headset, Peer to Peer)
 - Security (Windows Security Push, LASS, Cryptography)

Embedded Platform Differences

x86 processors

Full Win32 API compatibility

Basic images from 8MB

With 3rd party extensions

Multiple processors

Requires additional effort

Windows Media: Anytime, Anywhere

- Innovative Hardware Design
 - HDD based, 1"-1.5gig to 1.8"-40gig
 - 2.2 to 3.5" screen
 - USB 2.0
 - Composite TV Out
- Premiere Entertainment experience
 - Best video WMV 9 (4:3 and 16:9)
 - Highest quality audio, including WMA Lossless
 - Content security with WM10 DRM
 - Rich consumer friendly UI
- Best of class transfer with Windows Media Player
 - MTP -- no click synchronization, surprise interrupt
 - Video, television, audio, pictures all transferred
 - Playlists, album art, content ratings
- Great partners
 - OEM: Creative, Samsung, iRiver
 - Target prices of \$499US
 - Regions: US, EU, Japan, Korea, Taiwan, China
 - Content – CinemaNow, MLB, WMA Audio Sites
 - Retail – Best Buy, Circuit City

Partners Make It Happen

Partners

- Over 2,500 Windows Embedded Partners worldwide
- Exponential growth in China, Taiwan, India
- Gold partners in all major regions
- Industry experts
- Demonstrating value across product line

Community Makes It Happen

Community

- Newsgroups, blogs, chats, webcasts, user groups
- 100+ mobile and embedded MVPs
- Windows Embedded Developers' Interest Group
- Over 250,000 downloads of shared source
- Academic engagements – 300+ schools worldwide
 - Get Involved !

STANFORD UNIVERSITY»

WindowsForDevices.com

University of California, Irvine

Customers Make It Happen

Customers

- 1,000s of design wins
- #1 in embedded market share 2003 (Gartner, VDC) – 30%
- #1 in revenue 2001-2003 (VDC and IDC)
- Industry and strategy shaping feedback

Windows Embedded Academic Program

- What is WEMAP?
 - No cost program to enable academic development on the Windows Embedded platform
- Program Goals
 - Deepen our relationship with academia in both research and teaching
 - Engage directly with students in order to enhance their understanding of our products and technologies

Current Initiatives: Summary

Curriculum

Extra-Curricular

Licenses:

>400 Curriculum
Licenses
worldwide

Training:

Academic Devcon Redmond
TTT, Bangalore
Crash Courses –
Cape Town,
Maastricht
India WEE,
Bangalore,
Cambridge

Research:

77 Embedded RFP
Projects Worldwide

US Examples of Curriculum Deployment:

UNL – Establishing a model
embedded systems laboratory
California Polytech, Pomona
– 5 courses using Windows CE
California State, Northridge
– 4 courses using Windows CE
Georgia Tech
Wisconsin - Madison

Reference Books:

>125 Schools Worldwide

HEP:

Over 30 schools engaged
11 Partners worldwide

Students

1st Windows Challenge

29 Teams
120 Students
25 Professors

Mobile and Embedded Roadmap

Today

2005+

Windows Mobile 2003 2nd Edition

Pocket PC, Smartphone

Microsoft

Windows CE 5.0

Microsoft

**Windows^{xp}
Embedded**

Service Pack 1
Service Pack 2

Microsoft

Visual Studio .net

Microsoft

Windows

Code Name

**Longhorn
Embedded**

Microsoft

Visual Studio 2005

Futures

- Windows CE – v/Next
 - Tool updates
 - updated build system
 - Integration with Visual Studio 2005 “CoreCon”
 - More “Wizards”
 - Longhorn Technologies
- Longhorn Embedded
 - Componentized Longhorn
 - Embedded becomes the core of Longhorn
 - Easy SKU creation (MCE, Home, Pro, Tablet)
 - Embedded Enabling Features
 - Tool updates
- Visual Studio 2005
 - Will combine native and managed development in one IDE
 - Upgraded MFC and ATL libraries
 - .NET Compact Framework 2.0
 - Huge upgrade
 - Coming soon...

Innovation Excellence Awards
University Projects, 2003-2004

[Also known as our "Embedded RFP"]

innovate.

Embedded Systems RFP FY04

- \$1.7M awards total
- 77 projects worldwide in 26 countries
- 75 universities
- 62 research projects, 12 teaching projects
- Projects started - *Summer 2003*
- Projects completing - *Summer 2004*
- Wrap-up workshop - *Fall 2004 (September 7 & 8)*
- Overall theme: *Innovative Embedded Research & Teaching*

Projects Per Country

● Argentina	1	● India	4
● Australia	2	● Israel	2
● Belgium	1	● Italy	4
● Brazil	1	● Korea	1
● Bulgaria	1	● Lebanon	1
● Canada	3	● Portugal	1
● Chile	1	● Singapore	1
● China	1	● South Africa	2
● Czech Rep	1	● Spain	3
● France	5	● Sweden	1
● Germany	9	● Switzerland	1
● Hungary	1	● Taiwan	5
		● UK	8
		● USA	17

Embedded Systems RFP Final Workshop

Embedded Systems RFP Bonus Training Event

Post-RFP is the best part!

- Results become available & publishable
- Dissemination is key
- Successful project criteria:
 1. Papers – list of publications
 2. Posters – used at final workshop
 3. Web page – project URL to a webpage
 4. Demo – demo/video
- Curriculum objects to go into Curriculum Repository
- Central list of project web pages, posters, research results
- Special issue of IEE Magazine
- Special MSR research seminar
- Posters usable at internal and external events, e.g. TechFest, DevCon, RoboNexus – attractive as posters, but also great handouts
- GetEmbedded.net

Welcome at [www.getembedded.net](#)

Get Embedded .NET: Welcome

Welcome to GetEmbedded.NET (GEN)! This community site is currently dedicated to the winners of the [Innovation Excellence Awards for Windows Embedded](#). This site is created, maintained, and populated by these winners.

Winners...

 If you are a winner of an award, you should have received an email on how to register and login to this site. If you have not received this email, or are having issues logging in, please [email support](#).

For other visitors to this site, we regret that we can only let you this far! But don't worry, we're working to open the site up in the future so everyone can take part. In the mean time, get familiar with the global [Windows Embedded Community](#). If you are a student or professor, you should definitely check out the [Windows Embedded Academic Program](#), which includes information on the newly created [Hardware Empowerment Program](#).

SPOT (Smart Personal Objects)

- A new service platform: MSN Direct Watch
- A new embedded platform
- MSN Direct – Smart Watch
 - A new, specialized wireless service delivering customized personalized information through enabled watches that combine fashion and technology
 - Timely, glanceable information available at the flick of the wrist
 - News, weather, sports, stocks, plus personal messages and appointment reminders
 - DirectBand – Public FM radio subcarrier broadcast, always connected
- The client platform core is generic – low power, low cost, low footprint, high capability, secure
- For more info on the watch:
 - <http://www.microsoft.com/spot>

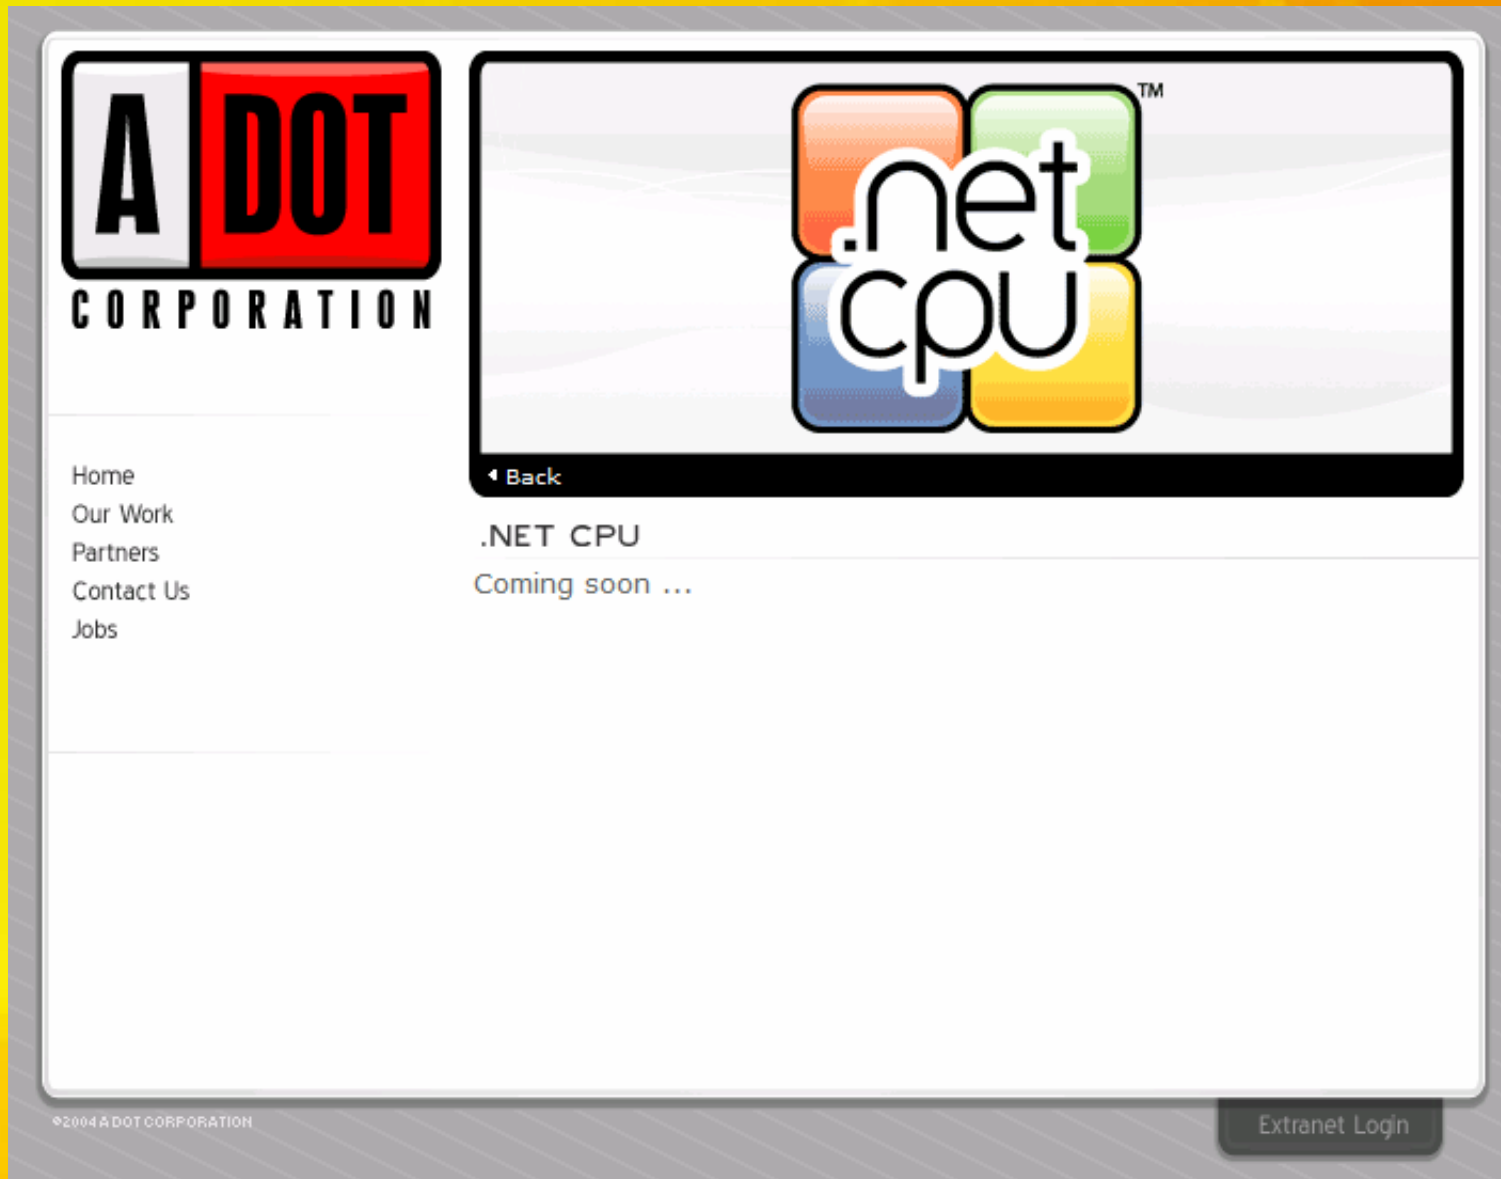

SPOT Development Kit

- Full kit contains:
 - "Stamp"
 - Development Board
 - SDK & documentation
 - Visual Studio 2005
- Availability...
 - Beta by end of 2004
 - 3rd party manufacturer

SPOT – .NET on a chip

<http://www.dotcorporate.com/>

Embedded OSs at Microsoft

Common:

- 32bit processors
- High capability compared to microcontrollers
- Visual Studio .NET
- Massive COTS ecosystem

Sensor Networks

- (See Feng Zhao's Faculty Summit Presentation)

A new class of computing platforms

Gordon Bell's Law: Technology advances enable a new, lower-priced, higher-volume computing platform or class to form every decade.

Berkeley WeC mote

Berkeley Spec mote

Hitachi
mu-chip RFID

Sensoria WINS NG 2.0

iPAQ handheld

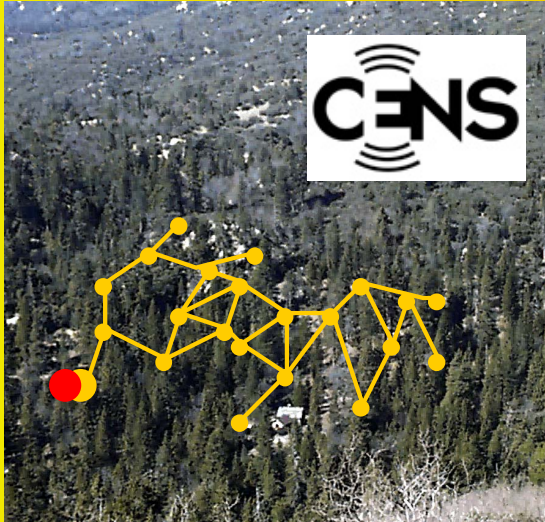

SPOT watch

Microsoft SPOT stamp

Three application classes

Monitoring space:

- E.g., habitat
- Occupancy, condition

Monitoring activity:

- E.g., parking garage, roadway traffic
- Spatio-temporal pattern

Monitoring objects:

- E.g., asset tracking
- Location, ID, property

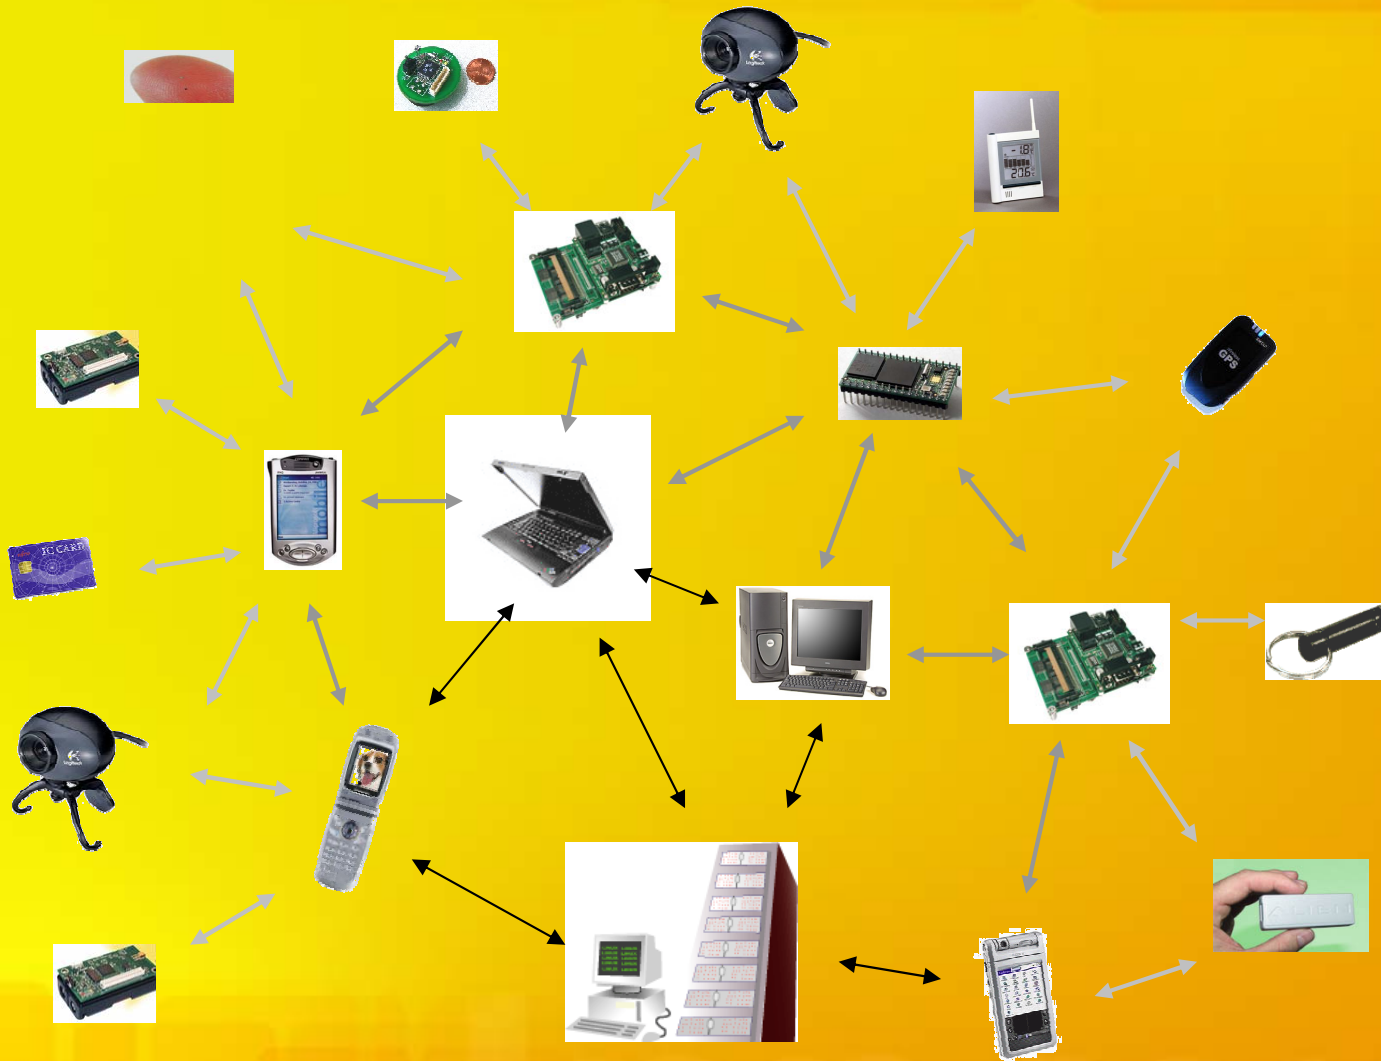

Blurring the boundary between digital & physical worlds

Characteristics:

- Heterogeneous devices
- Disparate capabilities
- Physically embedded (energy, size, noise, real-time events, ...)
- Dynamic topology
- Large scale
- Inherent uncertainties (in systems and environment)
- Concurrent user queries

Desired properties:

- Easy to program, deploy, and manage
- Robust to failure
- Responsive
- Re-taskable
- Scalable
- Secure

Programming Sensor Net: Finding the happy median

|--|--|---|

Blurring the boundary between the digital and physical worlds

What we are doing @ MSR:

- Connect sensor networks with PC ecosystems
 - Make sensors visible to PCs and physical information available to people 24/7
 - Bring services (e.g., web services) to small devices
- Develop platform and tools for networks of embedded devices
 - Deal with uncertainties in both systems and environments
 - Moving from “building unreliable systems from reliable parts” to “building reliable systems from unreliable parts”

<http://research.microsoft.com/nec>
<http://research.microsoft.com/invisible>

Robotics

- (See RoboNexus Presentation)

Robotics at Microsoft

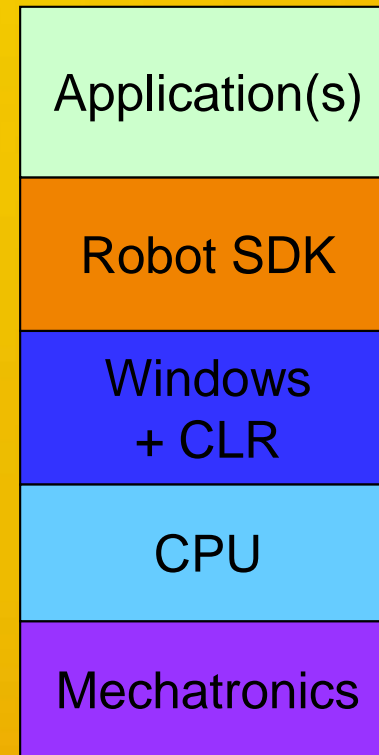

- A perennial hot area of embedded systems
- Robots are increasingly used as teaching tools
- Robots are engaging and gender-equalizing
- Our Robot Platforms initiative aims to achieve a far better robot experience for educators leveraging Windows and .NET
- Our Robotics Curriculum initiative aims to encourage the teaching of computer science, engineering and other disciplines through the excitement of robotics

What's a platform?

PC vs. Robot

Modern PC

Modern Robot

Robotics Examples

- Brown
- UPenn
- Cornell (3)
- Georgia Tech
- Humbolt
- Potsdam
- Rome
- Pisa

The background is a bright yellow color with a faint, repeating pattern of rounded rectangular shapes in a slightly darker shade of yellow. In the center, the Microsoft logo is displayed in a bold, black, sans-serif font. Below the logo, the slogan "Your potential. Our passion." is written in a smaller, italicized, black, sans-serif font. The entire text is contained within a white, irregularly shaped area that resembles a torn piece of paper.

Microsoft®

Your potential. Our passion.™
